Subject: Fw: Tub Bars

Garrett,

Hope all is well. Please see tenants comments below regarding your mechanic. Not sure if it was Derek but please let him know his attitude is appreciated.

Also please note that the quote for the grab bars should be given directly to the tenant as this will be her expense.

Thanks

Mark

P.S

My wife and I miss the crumb cake.

Subject: Tub Bars

Hi,

The plumber and an assistant were here today to remove the tub-faucet handle and to replaced it with the style that was there originally. They also worked on a "leak" in my toilet tank while they were here and that is fine now. I must comment that this plumber is polite, fast and thorough. It's a pleasure to have him working in the apartment.

While he was here, I told him . . . because of my advanced age and fear of falling . . . I no longer shower; however, getting in-and-out of the tub is also a hazard and it takes me a while to do so. I asked for bars in the tub so that I can lift myself up with ease and as soon as he gets the okay, he said that he would install them for me.

I'm at a loss about the person I should direct these requests to, so I'm sending them along to you. If there is some other protocol or a form I should be filling out, please let me know what "the drill" is.

Best,

R. Pedley
